SUMMARY

Full-Stack Engineer with 4+ years of experience building and shipping web applications across SaaS and trading platforms. Core stack: TypeScript, React/Next.js, and Node.js/NestJS. Track record of owning products end-to-end, from backend architecture and API design to polished, performant frontends. Founded and led a software company. Experienced in autonomous project delivery, direct client management, and high-velocity execution.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Rust

Frontend: React, Next.js

Backend: Node.js, NestJS, GraphQL

Databases: PostgreSQL, MongoDB, Redis

Cloud & Infra: AWS, Supabase, Docker, Kafka

Tools: Git, REST APIs, Agile/Scrum

EXPERIENCE

Full-Stack Engineer | **Freelance** Aug 2025 – Present

- Owned end-to-end delivery across multiple Web3 and trading products, from backend architecture to production-ready UIs.
- Built a crypto social platform with Privy auth and in-app trading (Solana/EVM), reducing frontend-to-backend requests by ~80% through query and database optimizations.
- Delivered a DEX trading platform with Hyperliquid perpetuals and EVM swaps, built and shipped in ~4 days.
- Developed a CEX strategy system with a React dashboard, Telegram alerts, NestJS API, and a Rust-based engine optimized for real-time market data ingestion.

Tech: TypeScript, Next.js, React, NestJS, Rust, Supabase, AWS, viem, wagmi

Full-Stack Engineer | **TokenSight** Dec 2023 – Jun 2025

- Took full ownership of the frontend as Senior Frontend Engineer. Improved Lighthouse scores and page load times, reduced bundle size, and refactored critical performance bottlenecks.
- Established the project repository architecture and component patterns adopted by the wider development team.
- Developed backend APIs and integrated third-party services, contributing to a seamless trading experience.

Tech: TypeScript, Next.js, NestJS, AWS, PostgreSQL, Redis, web3.js, ethers.js, viem, wagmi

Founder & Lead Engineer | **SmartIoT** Nov 2022 – Aug 2023

- Founded a software company to build a smart home platform in partnership with a leading construction company. Recruited and led a 3-person engineering team (mobile + backend).
- Designed the full backend architecture, selecting Node.js/NestJS for CRUD-heavy workloads and Kafka for high-throughput IoT device data ingestion.
- Oversaw all technical and business decisions, from technology evaluation to vendor coordination and client communication.

Tech: TypeScript, Node.js, NestJS, AWS, Kafka, PostgreSQL, MongoDB, Redis

Full-Stack Developer | **IpHome&Office** Aug 2021 – Oct 2022

- Managed 3 concurrent projects in a fast-paced startup, 2 of which shipped to production with real users.
- Owned client relationships directly and led projects independently from inception through delivery.
- Built frontend interfaces in React/Next.js and developed backend APIs and integrations using NestJS for IoT and SaaS products.

Tech: JavaScript, TypeScript, React, Next.js, GraphQL, Node.js, NestJS, PostgreSQL

EDUCATION

B.Sc. Software Engineering & Information Technologies 2019 – 2023

Faculty of Computer Science and Engineering, Skopje • 240 ECTS

Full-Stack JavaScript Academy 2017 – 2018

LANGUAGES

Macedonian (Native) **English** (Professional Working Proficiency)
